

The political speech in China, most of speaker are speaked with unacceptable slow tunes. And clapping of the time may longer than a sentence.

This project is consists of tow parts, a book and an online game. The book is about how to made the handclap in different occasion, Including Political speech, company meeting and so on. Explain the detail about the intensity and angle of clap.

The online game is an interactive platform for people to practice their clapping. The game will have some different emulation model, if people clap with correct tempo and intensity, the speaker or player will accelerat to finish their lectures.
