

## DECORATION

To the pylons are applied and blocked (through specific dockings) some aluminium wands (8mm diameter), on which have been previously placed some decorations (aluminium stencil laser cut recalling liberty style and letters reproducing the title of the work "If lu Fil Homsik, Tink in Dailect!" – If You Feel Homesick, Think In Dialect! The aluminium wands dockings are structures that can be easily replaced if they become damaged. The same decoration is applied to the two arch bars on the upper side of the dome, and on the side of the dome's base.
