

"Center of Cosmic Energy" Ilya and Emilia Kabakov

Proposal Essen, Kokerei 2001

sciple and Main Structure of the "Center of Cosmi

Compared number of the bareful of contribution by a notice contribution of the contrib

In integration of the discoveries streed as the basis for the idea of g ancient practices and the proposal for such as "experiment". How and way can the energy of the Cosmos the excitent and processed, so that over it would lead to the emergence of seek, unlimited possibilities for a size harmon.

g regularity: As seen as some structure, willingly or not, includes in it tation toward the Casmas, then the law of "60 degrees" is immediate

Four Intuitions

capacity of human intuition is "set in notion" in the most serious way variage behind the creation of a "Center", and will serve as one of the ethods to be used here, along with other scientific methodology con-in the Centre's argenimental work.

A way was a second was an end of a provide is which in the transmit of high the per second was a second was a second was a second of high transmit was a second was a second was a second of the second was a second was a second was a second of the second was a sec

The hybriding of 26 structure, seem is only work discovers to the off we circle off them is inter all lower to the globane of them them, constructure, them personnel and a structure, Same damaping the the constructure personnel of the structure and the structure. A the person personnel constructure is a theory and the structure. A the person person term is the structure and structure and the structure and the theory association and the structure. A the person person term is the structure and structure and the structure and the structure is structure and the structure and the structure and then beneficially constant with the structure and the structure and material of a structure, but an exploration of the struc-ture and the structure of the structure and the structure and the structure of a structure, but an exploration of the structure and struct and the structure of a structure, but an exploration of the structure and structure and the structure of a structure, but an exploration of the structure and structure and the structure of a structure, but and the structure and the structure and the structure and the structure of a structure, but and the structure and t remic Energy" built in Essen, in the ed and archeological premises) "permanents

50 disques analysis (see sinch). Subjecting uses in "count: angle" to the analysis of archeological discus-tation in implant of follower dimensionals, as new anticipated, their precisi considence: the might of the sint of the third of the measures was a 60 dispute angle to 50 disputent accuracity in indication that the discussion. The purpose angle to 60 disputent accuracity in indication that the discussion. The purpose angle to 60 disputent accuracity in indication that the discussion. The purpose is a sint of the badfing dates used in projecting the "Counte of Count: Entrop".
